

VaS Wardroom - NatCB - Feb 2023

	This ship has the listed stats that have been changed / added in addition to those on the FAQ - points in () or [] have these changes costed where noted
	This ship has a WLPA cost calculated
	This is a best guess points value having removed weapons and traits and comparing the base ship to similar ships.
	These are SHIPS 1.4 points. Please note a number of them have changed from 1.3 If using 1.4 do not mix and match with SHIPS 1.3
	(KM) The Radar (fore) and the T4 torpedoes +1 to hit Refits on Submarines have not been pointed up in SHIPS 1.4 <i>(The torpedoes are that short range and is the only weapon on the submarine means it's a free bonus for actually using it!)</i>

The Ships TAB gives you all the official stat'd ships, and their named class members. No official stats have been included, just names, years and points due to IP Laws
The figure in the points column is the total cost of the ship with all previous refits already calculated for you.

There are several systems of points, please use a single system for all players in your game(s) as each is a different points calculation and may cause unexpected balanced issues if you attempt to mix and match

WLPS	WarLord Points System	This is the Official points from the book and is included for those who do not want to use alternate points systems. It also highlights the inconsistencies of the official points. Refits are rounded to closest 5 points before final calculation
WLPA	WarLord Points Adjusted	This is WLPS but Nation & class consistency has been added to refits so you don't have one ship paying 5 points and another 10 points for the same thing. Extreme outliers have been best guessed repointed Where there is no entry in the WLPA column (highlighted in Light Blue) then there is no change from WLPS. Note there are NO WLPA for flights or MTBs
SHIPS 1.4		This is a from the ground up new points system calculated by Discord User Enioch. The final calculation of points after refits is rounded to the closest 5 points, which is why some refits don't change the cost of the ship Note : MTBs in 1.4 are still beta costs and so may not be balanced.

How to Use SHIPS 1.3/1.4

If using the SHIPS 1.4 column you will notice carriers have a base number followed by a plus another number /CAG. This is because when building your fleet flights on board a carrier (called a Carrier Air Group or CAG) are not free like with WLPS/WLPA but rather you have to pay the CBA (Carrier Based Aircraft) listed cost of the flight. You then add this cost to that of the carrier, if the cost is lower than the 2nd number (after the +) then you add that number instead

eg The Kaga is 150+ 90/CAG. So the cost in your list is 150 and the higher of either 90 or the CBA cost of the flights you have included as being on the Carrier.

In the Flights section there is the spotter plane entry for all nations. This is NOT a flight although it still takes up a 'flight slot' on the carrier, but rather grants Aircraft +1 Trait to the carrier, and can be purchased multiple times up to 25% of the flight capacity of the carrier rounding up.

Note 1: The use of scout flights doesn't alter the number of flights a carrier has. This means the calculations of how many flights can be deployed with scouting points doesn't change between points

Note 2: Unlaunched flights DO give up Victory points as destroyed if on a carrier when it is destroyed

SHIPS LBA & CBA

Flights have 2 costs under SHIPS, LBA (Land Based Aircraft) & CBA (Carrier Base Aircraft) Use the CBA cost when purchasing flights as part of a CAG. If purchasing flights as Land Based (up to 25% or 100% of total fleet value as per rulebook) then use the LBA cost instead.
